

POC PROJECT

Capacity & Utilization Intelligence Agent

TEAM 7

Noel Mathews
Priyatham Sai Kethavarapuu

Business Challenges

- Engineering insights scattered across multiple tools
- Dependence on spreadsheets and manual reporting
- Limited visibility into capacity and utilization
- Difficulty identifying burnout and workload risks
- Hidden skill dependencies and delivery bottlenecks
- Reactive decision-making instead of proactive planning

What is CUIA?

- Workforce Intelligence Platform for Engineering Organizations
- Centralized view of team health and delivery metrics
- Real-time workforce and utilization analytics
- AI-powered conversational insights
- Actionable recommendations for managers
- Future-ready forecasting and scenario planning capabilities

Key Principle

Deterministic Analytics + AI-Powered Explainability

Platform Capabilities

- Dashboards
 - Leadership Dashboard
 - Delivery Manager Dashboard
 - Team & Engineer Drilldowns
- Intelligence
 - AI Copilot
 - Recommendations Engine
 - Capacity & Health Analytics
- Additional Features
 - PDF Report Generation
 - Forecasting
 - What-If Simulations

Key Metrics

- Workforce & Delivery Metrics
 - Capacity Analytics
 - Effective Capacity
 - Sprint Capacity
 - Utilization Rate
 - Performance Analytics
 - Productivity Score
 - Velocity
 - Estimation Accuracy
 - Risk Analytics
 - Health Score
 - Burnout Risk
 - Single Point of Failure (SPOF)

Business Value

- Identify overloaded engineers early
- Track team delivery performance
- Monitor overall organizational health
- Detect burnout risks proactively
- Reduce knowledge dependency risks
- Enable data-driven decision making
